AGILE BUSINESS ANALYSIS

To remain competitive organisations must shorten the time it takes to deliver business change effectively. Agile development approaches enable project teams to be more responsive to customer expectations and to deliver business value early.

Agile Business Analysts are an integrated part of the Agile team, working before projects and programmes are defined, and throughout the life of the project. They facilitate collaboration within teams and across the business. In addition to their skills of modelling and specification, the Agile Business Analyst requires new skills to support collaboration, facilitation and iterative working. They must adapt to new ways of gathering, analysing and managing the emerging and evolving requirements.

AGILE BUSINESS ANALYSIS FOUNDATION & PRACTITIONER

This course, accredited by the APMG, and created in conjunction with the Agile Business Consortium, is designed to give the Business Analyst the skills needed to successfully gather, analyse, validate and champion the requirements throughout an Agile project. The course will describe the most popular Agile approaches and will use the DSDM Agile Project Framework to take the Agile Business Analyst through the phases of an Agile project.

Course Objectives
This course will enable delegates to:
- Understand the difference between traditional and Agile business analysis
- Identify stakeholders, personas and their involvement in Agile
- Describe the competencies and techniques of an Agile BA
- Understand the BA role in the Agile team and the organisation
- Capture and manage effective requirements for incremental solution delivery
- Recognise how an Agile Business Case differs from a traditional business case and present a lean business canvas
- Learn how modelling techniques fit into an Agile environment
- Understand the importance of Facilitated Workshops
- Understand the different ways of working as a BA in Agile

Who Should Attend
Those involved in business analysis within an Agile project, including:
- Business Analysts
- Product Owners and business representatives
- Project Managers
- Developers in Agile teams
- Testers in Agile teams

Course Duration: 4 days

Course Code: DABAP
